Write a C program for Merge Two Arrays

Your Code

```
1 #include <stdio.h>
2
3 int main() {
4     int arr1[50], arr2[50], arr3[100];
5     int n1, n2, i;
6
7     // Input first array
8     printf("Enter the size of first array: ");
9     scanf("%d", &n1);
10
11     printf("Enter the elements of first array:\n");
12     for(i = 0; i < n1; i++) {
13         scanf("%d", &arr1[i]);
14     }
15
16     // Input second array
17     printf("Enter the size of second array: ");
18     scanf("%d", &n2);
19
20     printf("Enter the elements of second array:\n");
21     for(i = 0; i < n2; i++) {
22         scanf("%d", &arr2[i]);
23     }
24
25     // Copy first array into third array
26     for(i = 0; i < n1; i++) {
27         arr3[i] = arr1[i];
28     }
29
30     // Copy second array into third array
31     for(i = 0; i < n2; i++) {
32         arr3[n1 + i] = arr2[i];
33     }
34
35     // Display merged array
```

Input

3

4

Output

Enter the size of first array:

Enter the elements of first array:

Enter the size of second array:

Enter the elements of second array:

Activate Windows

Go to Settings to activate Windows.

Write a program for binary search

Your Code

```
1 #include <stdio.h>
2
3 int binarySearch(int arr[], int n, int key) {
4     int low = 0, high = n - 1;
5
6     while (low <= high) {
7         int mid = low + (high - low) / 2;
8
9         if (arr[mid] == key)
10             return mid; // Element found
11
12         if (arr[mid] < key)
13             low = mid + 1; // Search right half
14         else
15             high = mid - 1; // Search left half
16     }
17
18     return -1; // Element not found
19 }
20
21 int main() {
22     int arr[] = {10, 20, 30, 40, 50, 60, 70};
23     int n = sizeof(arr) / sizeof(arr[0]);
24     int key;
25
26     printf("Enter the element to search: ");
27     scanf("%d", &key);
28
29     int result = binarySearch(arr, n, key);
30
31     if (result != -1)
32         printf("Element found at index %d\n", result);
33     else
34         printf("Element not found\n");
35 }
```

Input

50

Output

Enter the element to search:

Element found at index 4

Activate Windows

Go to Settings to activate Windows.

Write a C program for Count the Occurrences of an Element

Your Code

```
1 #include <stdio.h>
2 void main()
3 {
4     int a[10], n, i, x, count = 0;
5     scanf("%d", &n);
6     for(i=0; i<n ;i++)
7         scanf("%d", &a[i]);
8     scanf("%d", &x);
9     for(i = 0; i < n ;i++)
10         if(a[i] == x)
11             count++;
12     printf("%d", count);
13     return 0;
14 }
```
